Vision & mission

WHAT SETS US APART

OUR VISION

With rising costs and increasing volumes, both the supply chain and our planet are under growing pressure. Sykono's vertical lift solutions enable transport to operate as efficiently and sustainably as possible, helping keep logistics costs under control while reducing the impact on the environment.

OUR MISSION

We develop innovative vertical lift solutions that make transport chains more efficient and sustainable, keeping logistics affordable while easing the burden on the planet. We do this within a work environment focused on continuous improvement and strong, long-term relationships.

1

In partnership with Palfinger Tail Lifts, we combine agile innovation with multinational reliability.

2

A strong standard range for each lift model without compromising on quality and reliability.

3

Tailor the lift exactly to your customers' needs with our extensive range of options.

4

Fully pre-assembled as standard, enabling fast and efficient bolt-on installation.

5

A compact and lightweight design concept engineered for smart integration and performance.

6

Equipped with the reliable Palfinger electronic control system for precision and control.

2

Sykono Car Lift

CAR LIFT

As a trailer or body builder, you want to offer your customers a reliable solution to load and unload vehicles in a safe and user friendly way. With a wide range of lifting capacities available from 1500, 2000, 2500, 3000, and 4000 KG in the Sykono Car Lift, there is a suitable solution for every requirement.

With the Sykono Car Lift, double deck loading is possible, allowing your customers to use space more efficiently and reduce the number of transport movements.

In addition, the lift is designed for ease of use. The Palfinger control system can be specifically tailored to the customer's requirements, enabling the lift to be used in

the most efficient way possible. By using wear resistant components and minimizing friction during the design process, the Sykono Car Lift requires very little maintenance.

The flexibility in engineering allows us to deliver custom solutions, ensuring that the lift perfectly matches the specific needs of your customer. Our service goes even further, as

we also assist with installation solutions and deliver the lift plug and play, minimizing installation time.

The Car Lift is built in a compact design, meaning that body builders need to make only minimal adjustments to the rear portal of the vehicle before installing the lift. An additional advantage of the compact construction is weight reduction, which results in lower fuel consumption, higher efficiency during loaded kilometers, and reduced loss during empty runs.

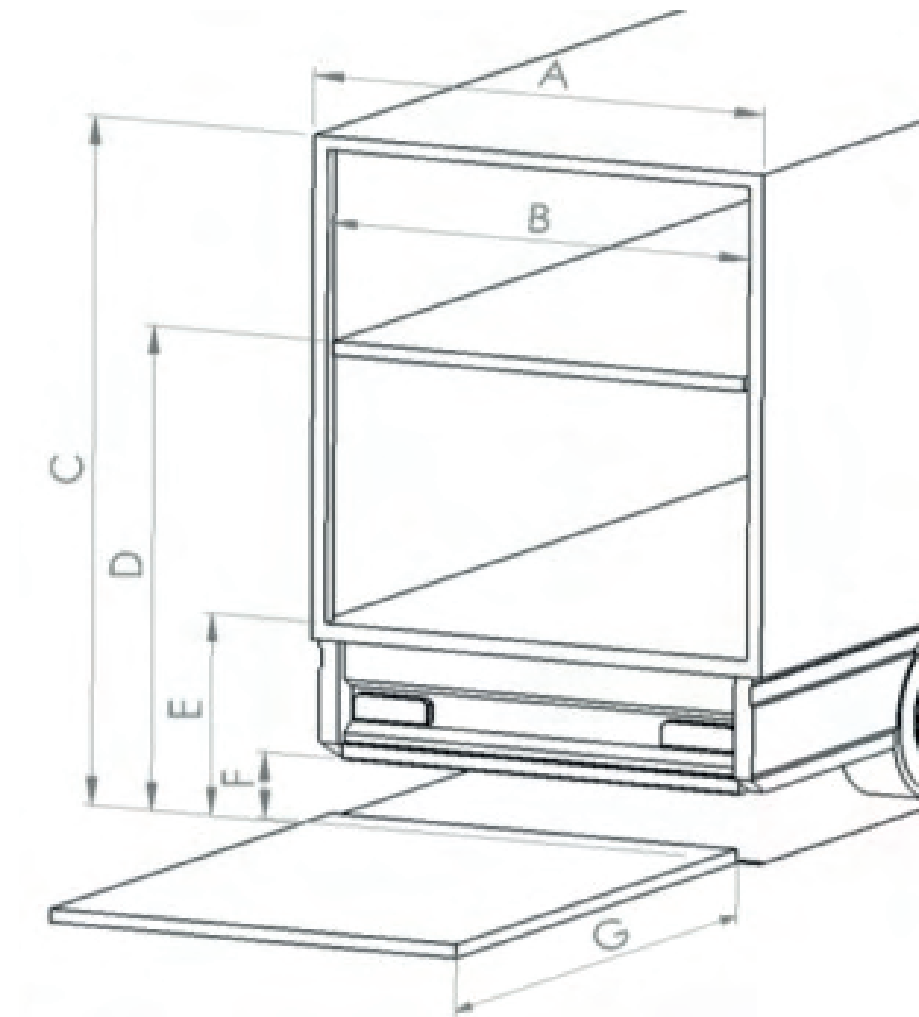

Lift solutions

PROFESSIONAL VEHICLE LIFTING SOLUTIONS

Dimensions	SCL 1500	Custom solutions
lifting capacities	1500 KG	2000 - 4000 KG
A	2500-2600 mm	2500 - 2600 mm
B	2240-2340 mm	2220 - 2320 mm
C	320 mm	370 mm
D	40 mm	40 mm
E	3600 mm	3600 mm
F	2445 mm	2445 mm
G	3575 mm	3575 mm

- Lifting capacities of 1500, 2000, 2500, 3000 and 4000 KG available for every requirement
- Double-deck loading floor saves space and reduces transport movements
- Little to no maintenance required
- Time saving during installation thanks to the assembled portal and platform
- Many optional applications available
- Professional after-sales service

OPTIONAL FEATURES

Code Equipment

- B1 A pair of roll stops (AluStar type)
- B2 Door in platform
- B3 Flashing lights
- B4 Roof construction
- B5 Assembly preparation for bodywork
- B6 Side panels
- B7 Sealing rubber
- B8 Aluminium F1 look advertisement panel
- B9 Preparation for rear lights
- B10 Rear round lights (light/brake/flach)

Code Equipment

- B11 Rear round lights (reversing/fog light)
- B12 Preparation for top lights
- B13 Top lights
- B14 Lifting height to 1200mm bottom roof
- B15 3 Bbutton control for body wall
- B16 Carging cable with plug and socket
- B17 Cabin safety detector (platform open)
- B18 Radio remote control (only with external power pack)
- B19 Foot control
- B20 Battery box
- B21 2x 12V additional battery pack

SYKONO SERVICE POSSIBILITIES

From custom engineering to ready-to-install systems and long-term support, Sykono delivers complete lift solutions. We combine smart design, efficient production, and expert guidance to ensure reliable performance and confident investment from day one.

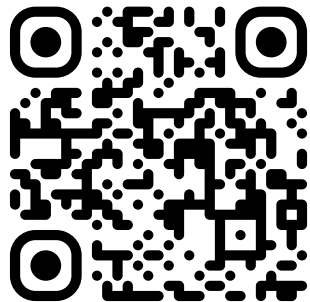

Code Equipment

- D1 Vehicle preparation for lift installation
- D2 Installation by Sykono
- D3 Painting and finishing in a RAL color
- D4 Sykono engineering
- D5 Custom production
