Vision & mission

WHAT SETS US APART

OUR VISION

With rising costs and increasing volumes, both the supply chain and our planet are under growing pressure. Sykono's vertical lift solutions enable transport to operate as efficiently and sustainably as possible, helping keep logistics costs under control while reducing the impact on the environment.

OUR MISSION

We develop innovative vertical lift solutions that make transport chains more efficient and sustainable, keeping logistics affordable while easing the burden on the planet. We do this within a work environment focused on continuous improvement and strong, long-term relationships.

1

In partnership with Palfinger Tail Lifts, we combine agile innovation with multinational reliability.

2

A strong standard range for each lift model without compromising on quality and reliability.

3

Tailor the lift exactly to your customers' needs with our extensive range of options.

4

Fully pre-assembled as standard, enabling fast and efficient bolt-on installation.

5

A compact and lightweight design concept engineered for smart integration and performance.

6

Equipped with the reliable Palfinger electronic control system for precision and control.

Sykono High
Performance lift

HIGH PERFORMANCE LIFT

The Sykono High Performance Lift has been specially developed for trailer manufacturers and body builders who need to provide their customers with a maintenance-free and versatile lift suitable for intensive use, without requiring service intervals and without losing height within the lift construction.

With the lifting cylinders positioned in the vertical movement direction behind the lift columns, and by using steel flyer chains instead of traditional steel cables, the Sykono High Performance Lift offers the perfect solution for this type of customer.

The technology of the Sykono High Performance Lift makes it possible to install the lift

on a box truck while still allowing the use of a trailer coupling. This makes the Sykono High Performance Lift one of the most versatile and robust loading and unloading solutions on the market.

With the additional possibility of double-deck loading, your customers can save even more loading space and significantly reduce the number of transport

movements. This not only improves productivity and efficiency but also benefits the environment.

The lifting capacity of 2000 KG is also ideal for loading and unloading most types of goods. In addition, the lift is space-efficient and lightweight, allowing your customers to load more without increasing the weight of the trailer.

Lift solutions

PROFESSIONAL VEHICLE LIFTING SOLUTIONS

Dimensions SHL 2000

lifting capacities 2000 KG

A 2550 mm

B

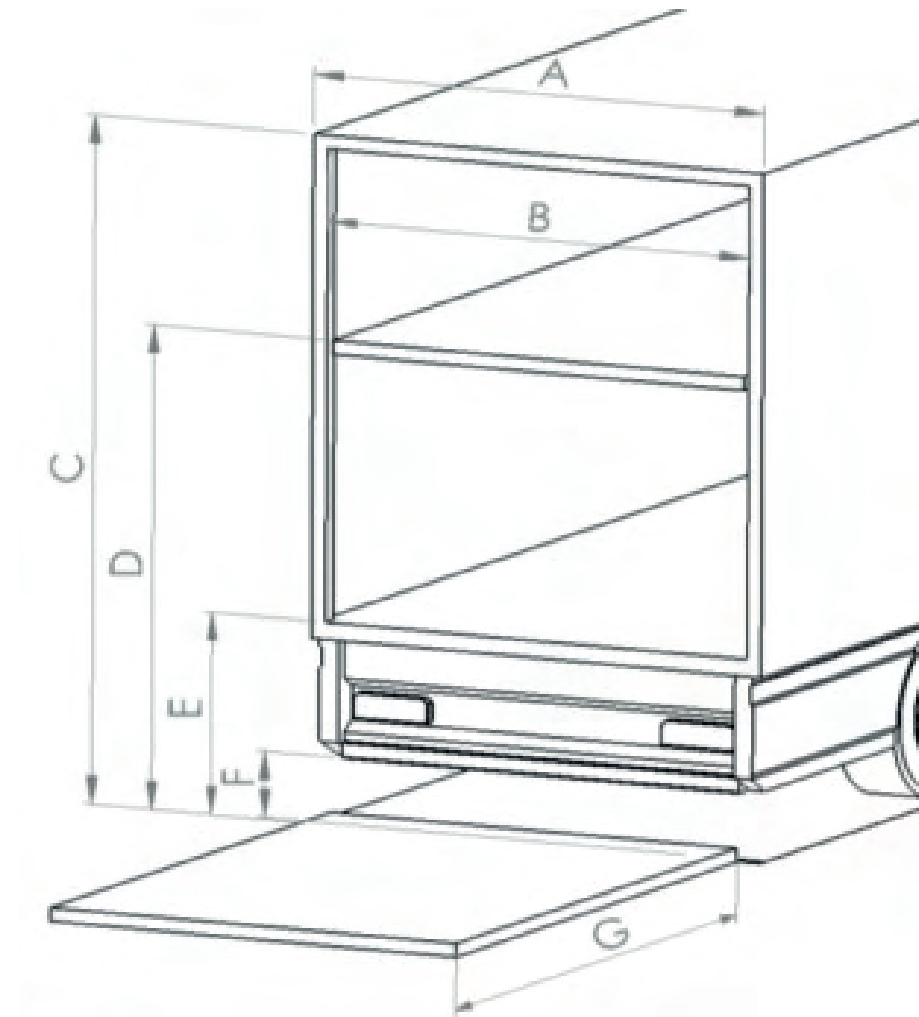

C 4000 mm

D 2600 mm

E 1200 mm

F 500 mm

G 2900 mm

- Maintenance-free and fault-free construction
- Space-saving, lightweight, and low-maintenance design
- Drive system integrated in the side column
- Suitable for installation on a box truck, allowing a trailer to be coupled
- Easy to equip with support legs
- Attractive lift model for (very) intensive use

OPTIONAL FEATURES

The Sykono High Performance Lift can be equipped with optional safety and performance features, including railings, ramp configurations, integrated lighting, and an emergency hand pump. Backed by professional after-sales support, it delivers reliable performance in critical situations.

Code Equipment

B1 A pair of roll stops (AluStar type)

B6 Side panels

B15 3 button control for body wall

Code Equipment

C2 “P” safety gate

C7 1-piece hinged ramp Length 900mm

C12 Weighing platform

SYKONO SERVICE POSSIBILITIES

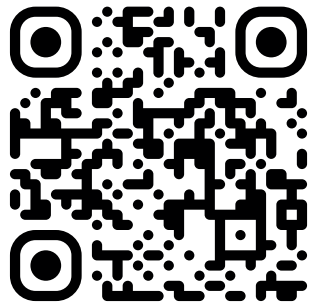

From custom engineering to ready-to-install systems and long-term support, Sykono delivers complete lift solutions. We combine smart design, efficient production, and expert guidance to ensure reliable performance and confident investment from day one.

Code Equipment

- D1 Vehicle preparation for lift installation
- D2 Installation by Sykono
- D3 Painting and finishing in a RAL color
- D4 Sykono engineering
- D5 Custom production
